

Hawaiian Coot Website

Complete Cinematic Audio & Documentary Guide

This document contains the complete cinematic documentary, soundtrack, environmental audio, nature ambience, and emotional atmosphere guide for the Hawaiian Coot endangered species website. The website should feel like a cinematic environmental documentary and immersive ecosystem experience.

1. OVERALL AUDIO & ATMOSPHERE GOAL

- The website should feel cinematic, emotional, peaceful, immersive, and environmental.
 - The soundtrack should support the visuals rather than dominate them.
 - The user should feel transported into Hawaii's wetlands.
 - The website should feel like a hidden ecosystem awakening.
-

2. CINEMATIC VISUAL REFERENCES

- FLYING OVER KAUAI (4K) — Hawaii's Garden Island
 - Link: <https://www.youtube.com/watch?v=1nf61dNdzPc>
 - Use for: cinematic drone movement, tropical atmosphere, Hawaii fly-in transitions.
 - Hawaii 4K Drone Paradise Islands From Above
 - Link: <https://www.youtube.com/watch?v=QRvNJX4SqcQ>
 - Use for: aerial island reveals, cinematic scale, ocean-to-land transitions.
 - FLYING OVER OAHU 4K Ambient Aerial Film
 - Link: <https://www.youtube.com/watch?v=4AtJV7U3DIU>
 - Use for: peaceful pacing, calm documentary ambience, environmental immersion.
 - The Rain Follows The Forest — Hawaii DLNR
 - Link: <https://dlnr.hawaii.gov/rain/video/>
 - Use for: conservation storytelling, ecosystem atmosphere, environmental emotion.
-

3. MUSIC STYLE

- The music should feel like a nature documentary soundtrack.
- Use cinematic ambient music blended with environmental nature sounds.
- Recommended atmosphere:

- - soft cinematic synth pads
 - - gentle emotional strings
 - - subtle piano textures
 - - atmospheric environmental layers
 - - peaceful immersive ambience
-

4. PERFECT EMOTIONAL FEELING

- The soundtrack should create:
 - - wonder
 - - curiosity
 - - peace
 - - emotional connection
 - - environmental importance
 - - cinematic immersion
-

5. NATURE SOUND DESIGN

- Blend real environmental sounds into the soundtrack.
 - Recommended nature ambience:
 - - tropical birds
 - - distant ecosystem ambience
 - - gentle wetland water
 - - subtle wind through reeds
 - - soft environmental atmosphere
-

6. HAWAIIAN COOT BIRD CALLS

- Use the authentic Hawaiian Coot sounds downloaded from the official Hawaii DLNR website.
 - Official source: <https://dlnr.hawaii.gov/wildlife/birds/ala-keokeo/>
 - Using the real bird calls makes the website feel authentic and emotionally connected to the real species.
 - Bird calls should feel natural and environmental.
 - Do NOT play bird sounds continuously or loudly.
-

7. BEST WAY TO USE THE BIRD AUDIO

- During the Hawaii fly-in intro sequence, use distant wetland ambience.
 - As the wetlands appear, subtly introduce the Hawaiian Coot calls.
 - When the bird appears on the homepage, softly play a realistic bird call.
 - After homepage activation, occasionally trigger soft environmental bird sounds.
 - Bird calls should feel distant, cinematic, and immersive.
-

8. PERFECT INTRO AUDIO FLOW

- Scene 1 — Ocean Fly-In
 - Soft atmospheric ambience, wind, and ocean atmosphere.
 - Scene 2 — Hawaiian Islands Reveal
 - Warm cinematic chords slowly enter.
 - Distant birds become audible.
 - Scene 3 — Wetland Descent
 - Wetland ambience becomes richer.
 - Water sounds and ecosystem atmosphere increase.
 - Scene 4 — Hawaiian Coot Reveal
 - Authentic Hawaiian Coot call plays softly.
 - Subtle emotional cinematic swell.
 - Scene 5 — Homepage Activation
 - Music resolves peacefully.
 - Ambient environmental loop continues softly.
-

9. BEST INSTRUMENTS

- Soft piano
 - Gentle strings
 - Ambient cinematic synth pads
 - Atmospheric choir textures
 - Environmental ambience layers
 - Subtle tropical percussion
 - Minimal marimba textures
-

10. WHAT TO AVOID

- Avoid loud cinematic trailer music.
- Avoid aggressive orchestral scoring.

- Avoid EDM or gaming-style music.
 - Avoid fast heavy percussion.
 - Avoid repetitive loud bird sounds.
-

11. WEBSITE ATMOSPHERE GOAL

- The website should feel like:
 - - a cinematic conservation documentary
 - - a hidden Hawaiian ecosystem
 - - a futuristic environmental interface
 - - an immersive educational journey
 - - a peaceful wetland ecosystem
-

12. FINAL DESIGN PRINCIPLES

- Keep the atmosphere calm and immersive.
 - Audio should remain subtle.
 - Nature sounds should blend into the soundtrack.
 - The homepage reveal should feel magical and emotional.
 - The Hawaiian Coot should remain the emotional centerpiece of the website.
-

Study the pacing, sound layering, atmosphere, transitions, and emotional feeling carefully. The Hawaiian Coot website should recreate the feeling of discovering a hidden Hawaiian wetland ecosystem through cinematic visuals, authentic environmental audio, and immersive storytelling.
